Duraguard proudly presents the MADE IN AMERICA series for your lighting solutions. Our Made in America series is completely made with American materials and ingenuity meeting all requirements of the American Recovery & Reinvestment Act (ARRA).

While the majority of our products are already assembled domestically in our US locations, our Made in America products are made with American aluminum and finished with DuPont powderpaint. Our entire Made in America series qualifies for contracts, grants, and loans under government programs.

All items are in stock and ready to be ordered now! Small orders will ship from our California warehouse with immediate turn-around, and most large orders can be shipped within two weeks.

When you buy from Duraguard, we put quality first! We know how important light distribution is and we are dedicated to exceed your expectations.

All fixtures in the Made in America series have Miro 4 specular aluminum (94% reflectance) reflectors that provide optimal light distribution and efficiency.

Each of our fixtures has a variety of aluminum reflectors to choose from to accomodate limitless applications, including roadways, parking lots, parks, and much more!

HID and Induction photometrics are available, with LED photometrics soon to come, to assist you in choosing the right fixture for your lighting needs.

All of our Made in America line can be wired to utilize the most sophisticated LED, Induction, Electronic HID, and Pulse Start technology in an energy-cost conscious world. We also offer these fixtures in conventional High Pressure Sodium and Metal Halide to meet your needs.

For further energy-savings, all models can be equipped with our Twist-Lock photocells with receptacle, in your choice of Instant or Time-Delay in both 120 and 277V.

Presentation is important and that is why we crafted our fixtures to be aesthetically pleasing to complement every job site to it's fullest. Our elegant designs captivate as well as provide the light output that you demand. Each fixture is finished with textured bronze DuPont powdercoat, and custom colors are available by request to accommodate your specific job requirements. This tough, durable finish will last for years to come under most weather conditions.

Underneath the excellent finish, each fixture is manufactured by precision automation with no visible seams or welds.

We have created a line of mounting arms and brackets including wall and round pole mounts as shown below.
