ENERGY-SAVING LED LIGHTING

Duraguard is pleased to announce we are now offering a wide assortment of our fixtures with the **Xicato LED module**. These spec quality modules feature perfect color, rugged reliability, and compact high flux.

FEATURES:

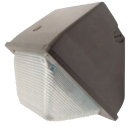

- Xicato uses a 1x2 MacAdam Ellipse to specify color allowing for color consistency from module to module and throughout its lifespan.
- Color temps of 2700K, 3000K, and 4000K for job-specific tailoring.
- Intensity and color are consistent so there are no yellow rings or color shadows produced.
- Long life of up to 50,000 hours.
- Xicato modules exceed DoE requirements for lumen maintenance.
- A choice of drivers; 350mA for maximum efficacy or up to 700mA for maximum light output.
- Modules can be customized with 20, 40, and 60 degree reflectors, or used without for a wider beam spread.
- Universal operating position allows fixture to be placed in any direction needed with no loss of light output as in conventional HID.
- Dimming capability for light harvesting and further energy savings (Analog or Digital).
- Fully enclosed LED construction allows individual modules to achieve an IP65 rating.
